

MASSACHUSETTS RENTAL VOUCHER PROGRAM

FY2020 FUNDING REQUEST: \$130 MILLION

MRVP provides housing stability and security to more than **8,300** low income households, including elders, disabled individuals, and families with children.

Support funding of \$130M for MRVP (line item 7004-9024) in FY2020.

RECENT SUCCESSES WITH MRVP:

- A reduction in the state's reliance on motels to house families experiencing homelessness;
- An increase of over **1,000** new units to the Commonwealth's supportive housing portfolio; and
- The preservation of affordability in units that would have otherwise been lost due to the loss of federal supports.

WHY NOW?

- The number of households experiencing housing instability and homelessness persists as Massachusetts remains one of the most expensive states in the nation in which to live.
- More than **60%** of the Commonwealth's renter households earning less than 30% of the Area Median Income (AMI) are severely cost burdened, needing to spend *more than half of their income* on housing costs; the same is true for 32% of MA renter households earning 31%-50% AMI. *
- HUD's 2015 *Family Options Study* demonstrated that families experiencing homelessness who secured a housing voucher experienced significantly better outcomes than other interventions. *Families able to access vouchers were less likely to reenter homelessness; more often remained intact; had fewer school interruptions for their children; and decreased their levels of toxic stress, including domestic violence.*
- Vulnerable residents of Massachusetts need reinvigorated state government supports for their stability amidst ongoing uncertainties within our federal policy environments.

WHAT WILL \$130M FOR MRVP IN FY2020 ACCOMPLISH?

- Annualize the cost of new supportive housing units and current vouchers, a projected cost of **\$116M**.
- Improve MRVP's effectiveness and reduce the amount of time it takes for voucher holders to obtain housing by setting allowable rents at HUD's area-wide, annually updated Fair Market Rent (currently \$1,740 for a 2-bedroom in the Boston area), thereby setting a baseline for vouchers that will work more effectively in the current market.
- Provide approximately **500** new mobile and project based vouchers beyond the current maximum utilization of the program.
